

AS2000 Switch for Extra Large Pressure Relief Device

Pressure Equipment

The AS2000 is a configurable alarm switch designed for integration with Qualitrol's XPRD (Extra Large Pressure Relief Device), offering enhanced transformer protection and environmental safety.

- Integrated with XPRD
- Dual spring-loaded valve for rapid actuation and reseal
- Directional shield for hot oil/gas discharge control
- Configurable via Oracle, Cadenas, and Vistech platforms
- Supports condition-based maintenance strategies
- Enhanced safety and environmental protection
- Switch types: SPDT, DPDT, HI DC, GOLD, STD
- Connection styles: ANSI, Q-STD, permanently attached, TB W/GND
- Device wiring: 3Q05, 4Q01, 3A01, 3P01, 7J02, etc.
- Indicator styles and semaphore options
- Gasket materials: Nitrile, Viton, Silicone
- Mounting gasket quantity and material
- Stainless steel body and piping options

Applications

- Critical transformer overpressure protection
- Load tap changers and oil-filled electrical apparatus
- Substations requiring high-flow relief and remote alarming
